

PUSH-PULL RODS

Run Cable in Ceilings and Walls Easily

Simplify Your Cable Installation

- Fibreglass rods with thick polypropylene coating.
- Ideal for running multi-purpose cable behind walls, up through crawl spaces and under floors. Perfect for every hard to reach place.
- Non metal/non-conductive bright yellow polypropylene coated rods protect delicate wires.
- Easily connected rods offer controlled flexibility.
- Faster and easier than old fashioned electrical fish for running cable, now you can push or pull cable inside or outside of conduit.

Set of 4 or 5 Push-Pull Rods

These 6mm diameter flexible rods are made of non conductive fibreglass with a polypropylene coating, and are flexible enough to go around corners and up and down walls through small openings, yet are strong enough to withstand virtually any test you may put them to. Each length is fitted with threaded attachments at each end. Connect as few or as many rods together as needed to attain whatever length necessary. CMS Push Pull Rods are sold as a set of 4 x 1.5mtr rods (6mtrs) or a set of 5 x 1mtr rods (5mtrs), at a price less than you would expect. These rods replace the old fashioned electrical fish formerly used for running and retrieving cable. Push Pull Rods are equally useful to push or pull cable inside or outside conduit.
