

# TRAX SERIES UMBILICAL

## Versatile Height Adjustable Cable Management

CMS Trax umbilical is specifically designed for cable protection when bringing power and data cables in a height adjustable table application. Trax features either single or dual compartment for cable distribution allowing power and data cabling to be run separate or simultaneously when using conduit.

### DESIGNED FOR HEIGHT ADJUSTABLE WORKSTATIONS

Trax is fitted with specific brackets to connect to the underside of the desk and back to the fixed cable tray below. This provides an easy and neat transition from the cable tray to the workspace. A magnet set can be optioned to fit the cable-tray bracket to provide an adjustable solution in place of fixing screws.

Standard colours Black and White are available ex-stock with a full range of alternative colours subject to specification and minimum order quantities.

*Trax Single & Dual compartment*

### ORDERING INFORMATION - PRE-CONFIGURED KITS

PART NO.	DESCRIPTION
