

# CPU30 CPU HOLDER

*Height adjustable*

*Rotates 360°*

*Width adjustable*

*Under desk slide function*

The CPU30 holder effectively raises the CPU tower off the floor and stores the CPU in a safe position under the work surface, therefore protecting your equipment and saving room on your desktop. The rack allows the CPU to work on a sliding system and rotates a full 360° providing easy access to cables and ports. This versatile holder is constructed from Aluminium to secure your CPU tower.

## FEATURES INCLUDE:

- Simple sliding system and rotates 360°
- Stores CPU vertically beneath your workstation
- Width and height adjustable
- Weight capacity of 10kg
- Aluminium body clamps tightly on top & bottom of CPU to hold securely
- Standard version accepts following CPUs:  
Min: 280mm x 60mm  
Max: 380mm x 120mm
- Wide option bracket to accommodate 140-200mm CPUs.
