

FLIP IN DESK UNIT

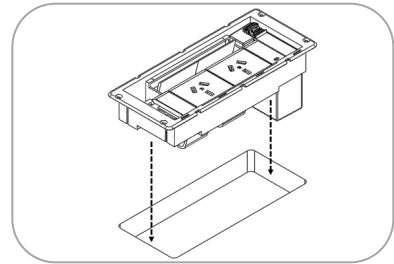

1 CUT OUT

Determine desired orientation/location of unit and cut the hole into the table top. **ENSURE YOU REFER TO CUT OUT DIMENSIONS ON DRAWING AS DIMENSIONS WILL VARY DEPENDING ON YOUR RAIL CONFIGURATION.**

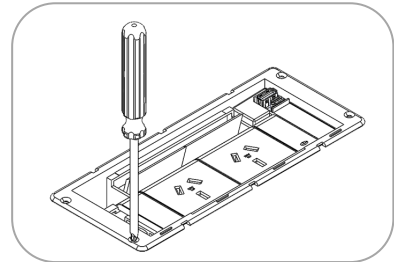

2 INSERT RAIL

Align the housing in the cut out, lowering it into place.

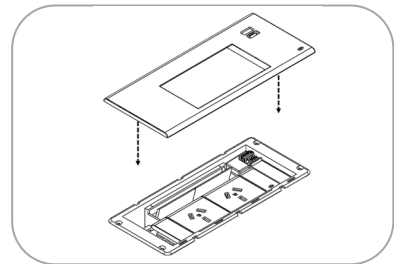

3 ADD SCREWS

Screw the unit into position. There are four screws total, one in each corner.

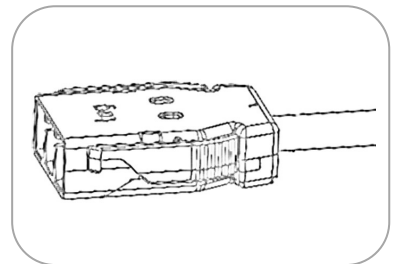

4 CLIP ON COVER

Align and clip on the cover, pressing down above where the clips are located.

5 CONNECT TO POWER

Plug into power source

Available Power Outlets
