

## UNDERCARRIAGE IN DESK BOX

### In Desk Solutions

CMS Undercarriage in-desk power and communications centre is an effective way of supplying power and communication connections within the workstation, boardroom, conference or meeting tables. This allows the installer to attach their own lid to suit its surroundings. It enables all services to be connected within the work surface with access through the lid.

To further enhance work surface connectivity CMS offers a range of customised Audio Visual Provisions to suit all applications.

### Key Features

- » The convenience of power and data at the desktop.
- » Uncluttered work surface when power not required or while plugged in. Appliance cables exit through installers own choice of lid to suit.
- » Fixes easily into rectangular location.
- » Undercarriage made from galvanised steel with black powder coat finish.
- » Strong and durable.
- » Fully segregated for power and data.
- » Available as power only or power/data combination/audio.
