

AXESS

CMS Axess is specifically designed for cable protection when bringing power and data cables from the floor or ceiling to the work surface. A fully featured cable management system with a designer edge.

The snap-together 'Rigid Mode' provides a self-supporting cable column as an integrated option within the system. At the same time, the snap-apart 'Flexi Mode' provides all the flexibility you need in an umbilical product. With its unique door innovation, the Axess umbilical has integrated doors that allow free access to cables at any time.

FLOOR TO DESK:

When used from the floor to the desk, Axess provides an attractive and flexible solution for cable distribution. The delivered product comprises of the Axess itself, a floor foot and a screw fixing anchor for the top.

When used with raised access floors, Axess can be fitted with a special grommet base that can be locked into a CMS Cableway 1000 access floor grommet. This provides an easy and neat transition from the floor space to the workspace. Other mounting options available are the standard floor foot and wall plates (for mounting to a cavity wall). Customized mounting solutions are available by consultation.

- Axess can be installed after cables are in place
- Cable can be accessed at anytime during installation
- Extra wiring can be easily installed at any time in the future

ORDERING INFORMATION

PART NO.	DESCRIPTION
AXFD1*/#	Axess 770mm long - Floor to desk, complete with anchor for desk mounting & round disk floor base
