

WIRE GRID BASKET

Wire management - Back to back solution

2 Tier shown with WWLT1.10 brackets

CMS have released a new 'T' mounting bracket to allow installation of single tier baskets in a back to back application.

The mounting brackets screw to the underside of the workstation or back into the modesty panel & allows the basket to 'snap' into the bracket. These baskets can also be cut to a custom length on site with the new plastic end caps available to tidy up the trimmed ends.

SOME OF THE FEATURES INCLUDE:

- Cost effective cable reticulation
- Different configurations are available
- Switch between tier to single tier
- Precious silver powder coat finish

WWLT1.10 shown
