CMS Electracom

Custom for every application

At CMS, we know that every build is unique. That's why we can customise our floor trunking to exact specifications, including material, depth, configuration, and other specific power requirements.

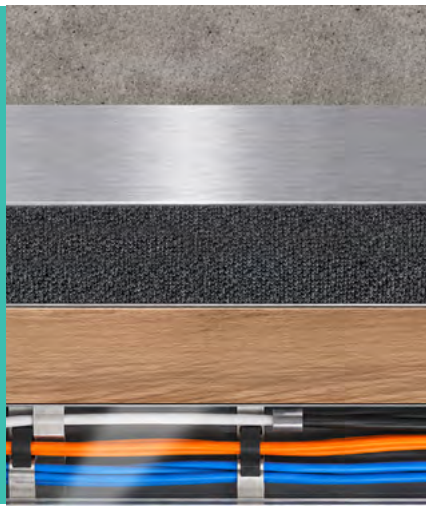

Speak to our sales team today to discuss a custom solution for your next build.

Explore some of the innovative ways our floor trunking has been designed to accommodate any application:

DESIGNER OR DISCREET

Customise your solution to suit a range of access and appearance specifications:

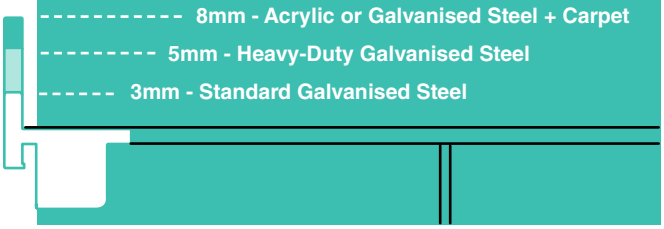

- Invisible: Completely covered by carpet or concrete
- Channel-access: A run of carpet or veneer that can be easily removed to access cabling
- Clear: Acrylic solutions for total visibility and access to cabling

CUSTOM DEPTH

Our unique extrusion join allows for complete flexibility to **accomodate stylish floor coverings whilst still allowing easy access to cables and power.**

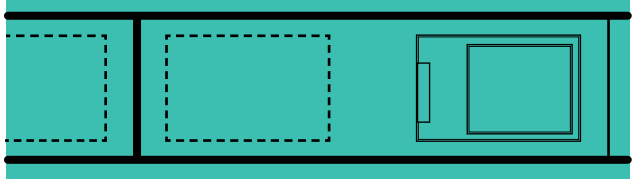

The extrusion height can be adjusted to accommodate carpet, tile, floor board, and other floor coverings, **creating a discreet access channel** that blends in with the floor.

INFINITELY CONFIGURABLE

Need something bespoke? Our team can use your plans to create a custom trunking plan to suit your depth and layout requirements.

All that planning and you still run into complications on-site? Our straight-run trunking offers an innovative punch-out design that can be quickly converted into a junction access point, keeping your project moving without needing to order replacements.
