

ELEVATE MKI MONITOR ARM

MON6-202 Shown in white

The CMS Elevate monitor arm is a unique desk mounting modular system that provides greater space capacity, flexibility and superior ergonomics to your monitor.

This computer mount solution will allow you to free up important desk space and position your LCD monitor at the perfect ergonomic height, distance and viewing angle to help increase viewing comfort and improve performance. Height adjustment is made easy by the wind up handle for quick and easy height positioning. This monitor is easily mounted onto your workstation with a strong desk clamp for stability or can run through the workstation desktop. Also, cables are guided through the loops on the underside of the arms for a clutter-free workspace.
