

IN-WALL BRACKET

TV/Monitor Mounting

In-Wall Bracket

Media Mounting Range

The In-Wall bracket simplifies the process of mounting LED, LCD or Plasma displays with their associated media equipment in commercial fit outs.

The In-Wall bracket recesses into the wall, providing storage for media peripherals and allowing the display to be mounted flat against the wall.

To achieve an exceptional fit and finish while achieving significant installation and cost efficiencies, specify the CMS In-Wall bracket.

Key Features
