

TWISTO - ROTATING COVER GPO SERIES

Rotated Outlet Cover

The NW18RC series features a rotating cover

NW18RC series outlet integrated into a Centra Indesk Module

INNOVATION IN ACCESS

The NW18RC series of outlets deliver a new realm of application and access, enabling a new way to delivery power to the end-user.

The rotating cover conceals the auto switched outlet, preventing accidental access, it is engaged by inserting and rotating 45° to connect the device.

IDEAL FOR INSTALLERS · DEVELOPED BY DESIGNERS

The unique NW series GPO features a detachable faceplate and rotating outlet cover which allows the creation of custom faceplates. At the same time the NW18RC series complies with installations into a flat surface.

SIMPLE & EFFECTIVE

- Integrates into *Centra* in-desk units for surface-mount applications
- Rear clip-in access allows flexibility of installation.
- Works with all CMS Power, Data, USB and AV modules.
- Rotating cover enables unit to be installed in face-up applications.
