

Twisto Series Rotated Outlet

Softwired GPO

The NW18RC series of outlets deliver a new realm of application and access, enabling a new way to delivery power to the end-user. The rotating cover conceals the auto switched outlet, preventing accidental access, it is engaged by inserting and rotating 45° to connect the device. The unique NW series GPO features a detachable faceplate and rotating outlet cover which allows the creation of custom faceplates. At the same time the NW18RC series complies with installations into a flat surface.
