

WIREWAY

Wire management - Single & Dual tier solution

2 Tier shown with WBB1 plates, GPO & Data Tiles (not included)

CMS have now released a new flexible cable management basket with two new vertical mounting brackets, which allows the installer to switch between a two tier basket to a single tier basket.

The mounting brackets screw to the underside of the workstation or back into the modesty panel & allows the basket to 'snap' into the bracket. These baskets can also be cut to a custom length on site with the new plastic end caps available to tidy up the trimmed ends.

SOME OF THE FEATURES INCLUDE:

- Cost effective cable reticulation
- Different configurations are available
- Switch between tier to single tier
- Precious silver powder coat finish
