

# **CMS** **ENGAGE** SMART WORKPLACE TECHNOLOGY

## PRODUCT BROCHURE

---

# CMS Engage The **Evolution** of Softwiring

As the modern workplace continues to evolve, the challenge today is to ensure it is working more efficiently and effectively. Understanding how the workplace is being used, with consideration of power consumption and its impact on our environment are just some of the challenges enterprise face today. Just as important, employees require the tools to book and reserve space remotely or when in the office to remain engaged and productive.

CMS Engage is a smart workplace technology solution, digitalising the seamless interactions between employees and the workplace, while property and facility managers monitor space utilisation and energy consumption to provide insightful analytics on how their workplace is being utilised.

# WHY WE DEVELOPED ENGAGE

## The Current State of Work

As the modern workplace continues to evolve, the challenge today is to ensure it is working more efficiently and effectively.

## Future-proofing the workplace

Delivering companies, the ability to create a people-orientated workplace that empowers creativity and productivity.

## Wellbeing at the forefront

Demonstrating a tangible improvement to employee experience when interacting with their place of work.

## Smart Workplace Technology

The result of immersing ourselves into the world of smart power and technology. The team at CMS sought to evolve power at the desk to deliver a completely new experience and potential for users and administrators.

# Engage Difference

## Return to normalcy

With 2020 presenting a shift in how the office is viewed and used, CMS Engage assists in restoring confidence to safely return to the office administrators can now present employees clear visibility on appropriately distanced, cleaned and ready-to-use workspaces including workstations, conferencing and quiet rooms.

## Seamless Integration

All energy and occupancy analytics gathered by CMS Engage can be ported into a centralised building management system via open API, or used as a stand-alone platform.

## Total control

CMS Engage delivers unrivalled energy management and reporting accuracy with Smart Cell, which can completely de-activate and energise workstations from the wiring backbone. This allows administrators to redeploy workspaces in line with social distancing.

## Unprecedented Energy Management

CMS Engage integrates into the workstation's structured cabling. This gives administrators the unique capability to pre-set workstations to shut-down and energise on-command based on the user's check-in/out procedure.

## Empower productivity through insight

CMS Engage desktop platform delivers administrators powerful insights into how spaces are used. Accurate reporting on energy usage and workspace occupancy empowers administrators to make informed decisions.

## Inspire Confidence Through Visibility

In advance, employees can review, reserve and check-in to available and safe-to-use workstations or meeting rooms on their mobile device via the CMS Engage desk-reservation app.

# SCOPE OF SERVICE

Upon successful project submission and tender, clients can expect the following scope of service from CMS:

- A completed commercial agreement covering all aspects of CMS products and services provided.
- Acknowledgment of the project requirements checklist.
- Professionally drafted Itemised drawings identifying hardware type and locations, zones for gateway pairing and gateway locations (recommended), colour coding for product identification.
- Associated hardware packed and delivered according to schedule in kit-form by zone & floor level (if applicable).
- Access to CMS Technology and Design personnel who assist in overseeing delivery & initial integration of CMS hardware and software. Refer to SLA for full details.
- After sales service and support, both on-site and remotely via CMS sales, product and software engineering teams:
  - Localised call centre support.
  - Global network of CMS sales and technical staff to assist on-site.
  - Extensive product and software commissioning guides and videos.
  - Complete product and software certification and compliance documentation.

# WE CONNECT YOUR WORLD

... AND WE LIKE TO DO IT PERFECTLY

## SOME OF OUR PROJECT PARTNERS

# PRODUCT

## Above the Desk

### 1. Status indicator

- » Shows status of the work station above the desk via illuminated 50mm tile.
- » Integrates into CMS Athena above desk power rail and Echo in-desk power modules.
- » Can be used to manually toggle between status modes via built-in capacitive switch.

- Available
- Booked
- To be cleaned
- Meeting
- In use
- Do not use

## Below the Desk

### 2. Occupancy sensor

- » 3 sensors to accurately report movement, presence and desk-height status (for height-adjustable workstation application).
- » Integrates with CMS Engage Smart Cell to transmit occupancy data.
- » Utilises Zigbee 3.0 and Bluetooth 5.1 via wireless mesh network.
- » Power activation mode.

### 3. Smart cell

- » Power monitoring and management. (On/Off, Schedule tasks, Zigbee 3.0, BLE 5.1 with mesh capability).
- » Automatic reporting - power/energy analytics.
- » Compatible with Engage sensor - occupancy and sit/stand detection.
- » Simple 3 step pairing method or can come pre-paired.
- » Compatible with Engage statistic dashboard.
- » Softwired structure.
- » Compatible with Engage status indicator used above the desk.
- » Physical reset button for on-site override.

### 4. Gateway

- » The gateway acts as a portal to deliver event data of up to 200 devices to our Australian Based Amazon AWS cloud dashboards and mobile app while forming a wireless mesh system in-between and to our smart devices using Zigbee 3.0 and Bluetooth 5.1.
- » Receives data communication from up to 200 Smart Cells and uploads to the network to be integrated into the user's building management system.
- » REST API for easy into 3rd party building management platforms.

## In the Ceiling

## SMART SENSOR

TECHNICAL DATA	DESCRIPTION
INPUT VOLTAGE (V)	5V, 50/60HZ, 0.25A MAX
PROTOCOLS SUPPORTED	ZIGBEE AND BLE 5.0
OPERATING TEMPERATURE	0~50 °C, 0% - 90% RH
ON-BOARD SENSORS	MOTION SENSOR, TEMPERATURE SENSOR, & ULTRASONIC SENSOR
ZIGBEE PROFILE	HA 1.2 PROFILE
PIR HUMAN MOVEMENT DETECTION RANGE (METERS)	UP TO 5M CEILING TO FLOOR
HUMAN PRESENCE/AVAILABILITY DETECTION RANGE (METERS)	UP TO 2M WITH 80 DEGREE ANGLE
HEIGHT DETECTION RANGE (METERS)	UP TO 2M
AMBIENT TEMP DETECTION	0°C TO 60°C
<b>LED COLOR OF SMART SENSOR</b>	
GREEN	AVAILABLE
CYAN	IN USE

## SMART CELL

TECHNICAL DATA	DESCRIPTION
INPUT RATINGS	80 -280V AC(SINGLE PHASE), 50/60HZ
OUTPUT RATINGS	80 - 280V AC(SINGLE PHASE), 50/60HZ
STANDBY POWER	< 1.0W (IN AP MODE)
MAXIMUM WITHSTAND VOLTAGE	< 280V AC (L-N) CONTINUOUS
NUMBER OF LOAD CHANNELS	80 - 280V AC - 1 NO 5V USB DC X 2 @ 0.5 AMP EACH 5V ETHERNET PORTS FOR RGB & RFID
MAXIMUM LOAD RATING	20 AMPS IN AC OUTPUT 1.3 AMPS TOTAL WITH 2 USB OUTPUTS
<b>PROTECTIONS</b>	
OVERVOLTAGE PROTECTION	280V
UNDERVOLTAGE PROTECTION	80V
OVERCURRENT PROTECTION	20A TOTAL
<b>COMMUNICATION</b>	
WIRELESS FREQUENCY & MODULE	ZIGBEE HA 3.0 PROFILE AND BLE 5.0
<b>ENVIRONMENTAL</b>	
TEMPERATURE	OPERATING: 00 TO 50OC STORAGE: -20° TO 70°C
RELATIVE HUMIDITY < 90%	< 90%
<b>STATUS INDICATORS OF SMART BOX</b>	
RED LED ON	LOAD ON
RED LED OFF	LOAD OFF
SOLID BLUE	CONFIGURED AND CONNECTED TO THE GATEWAY
BLINKING BLUE	DEFAULT MODE (WHEN NOT ADDED TO GATEWAY)
<b>SWITCH FUNCTIONALITY (TOGGLE SWITCH)</b>	
SWITCH 1	ON/OFF (RELAY)
SWITCH 2 - PAIRING BUTTON	PRESS AND HOLD THE BUTTON FOR 7 SECONDS THE DEVICE WILL BE ADDED/DELETED

NOTE: NO DRAFT ON VISUAL SURFACES  
CREATE USING SLIDING CORES

Visual Surface Secondary Surface

BLUE = VISUAL SURFACE - TEXTURED MOLDTECH MT11510  
WHITE = SECONDARY SURFACE - POLISHED SPI A-3

Technical drawing of a triangular light fixture. The drawing includes a top view, a side view, and a cross-section view. The top view shows a triangle with dimensions: 44.1 (top edge), 47.30 (right edge), and 41.20 (left edge). The side view shows a height of 2.75 and a base of 10.0. The cross-section view shows a thickness of 0.8 and a base of 10.0. The drawing also includes a detail view of the top edge showing a sliding core joint. The drawing is labeled with dimensions and a note: "NOTE: NO DRAFT ON VISUAL SURFACES CREATE USING SLIDING CORES". A legend indicates: "BLUE = VISUAL SURFACE - TEXTURED MOLDTECH MT11510" and "WHITE = SECONDARY SURFACE - POLISHED SPI A-3".

# CMS ENGAGE BOOKING APP

## Advantages

- » No check in - no power
- » Automatic check in with proximity over BLE
- » QR Code generation for desks with no smart products and power
- » Simple and user friendly
- » Admin, concierge, cleaner and user platform all differ upon log in
- » Report generation
- » Flagging desks where required by user
- » Concierge and cleaner capable of releasing desks - COVID Safe

Choosing location and date

Selecting desk on floor map

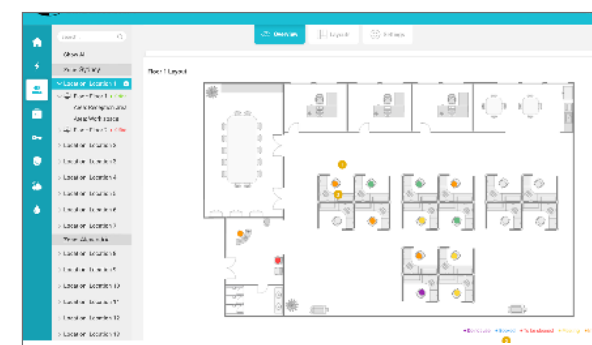

Auto check-in when approaching desk

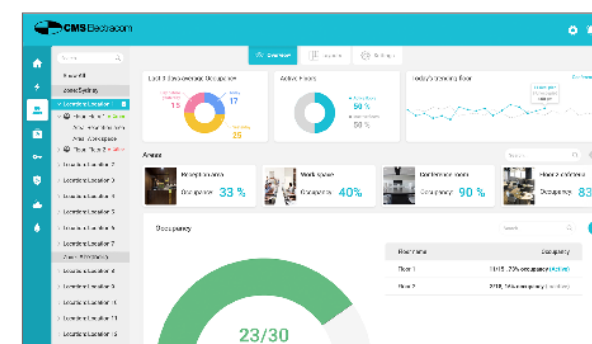

Manual check-in via QR code scanning

# ANALYTICS DASHBOARD

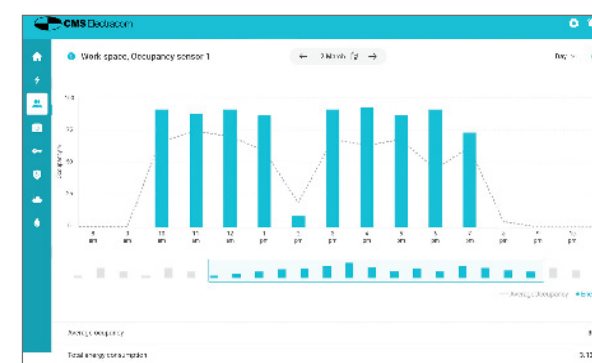

## Live floor layouts

- » Floor layouts and live status can be used with Floor kiosk to show desk status with live readings from multiple sites to a single area per level.

## Occupancy and space utilisation

- » Utilise the ability to remotely de-activate workstations for social distancing.
- » Accurately provide cleaning schedules for cleaning staff to indicate safe-to-use workstations.
- » Ability to deliver usage and occupancy insights to determine peak usage and capacity with time-lapse heat mapping.

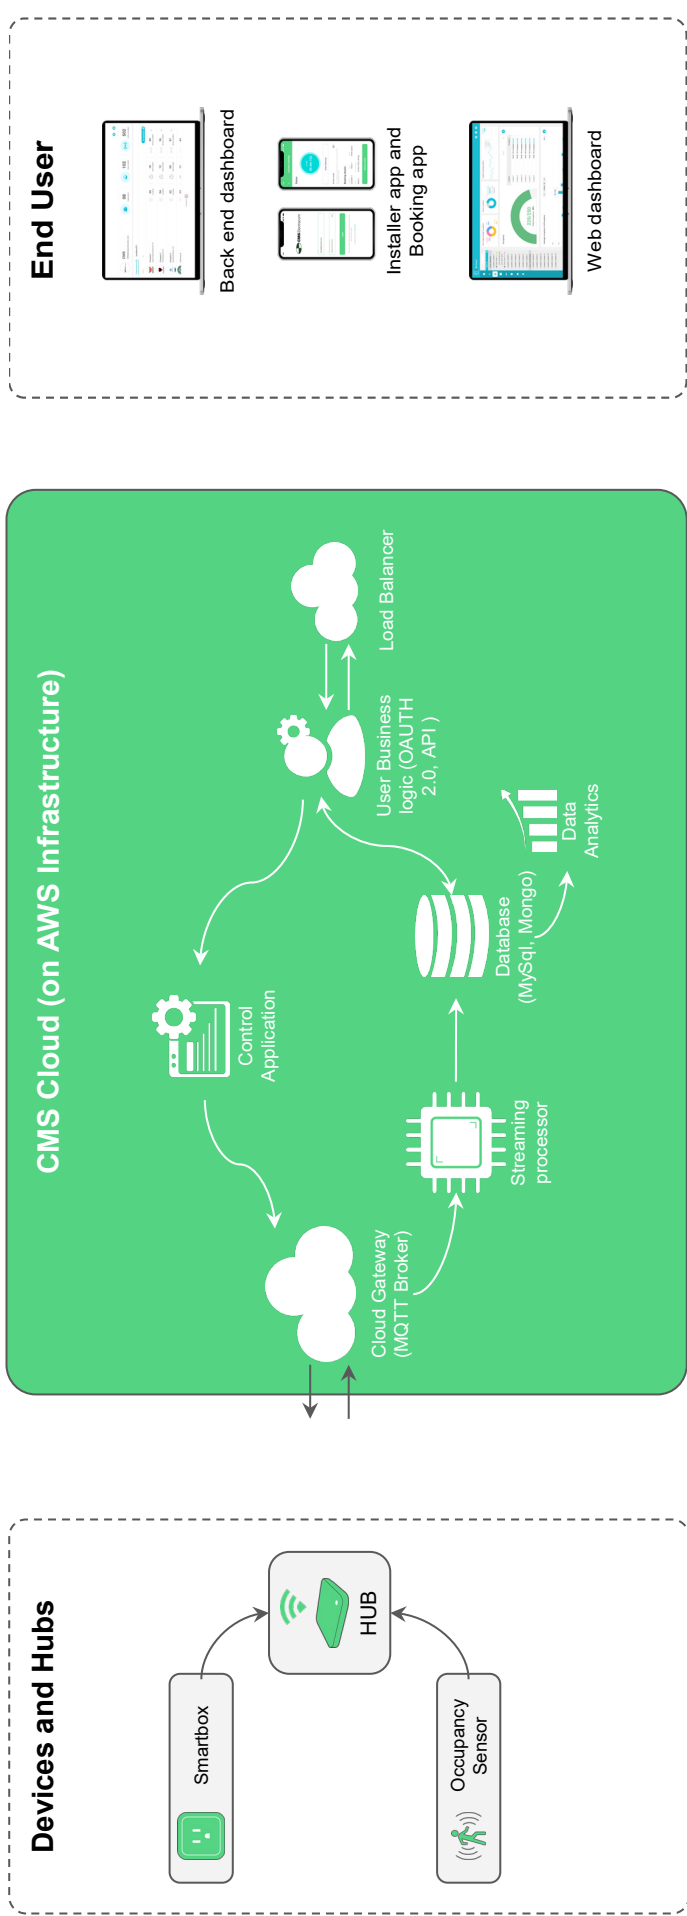

## Energy management overview

- » Provide a more complete picture of energy consumption by integrating workstation power usage in to the existing building management system together with HVAC, lighting and security.
- » Engage enables the ability to shut-down workstations completely when they are not in use, and energise it when a successful check-in procedure has been completed.

 Cms Softwiring Cable Male To Female	 Cms Engage Below-Desk Sensor thermal, Time-Of-Flight, Ambient Temp	
 Cms Softwiring Gpo	 CMS ENGAGE SMART CELL MODULE BLUETOOTH, ZIGBEE 2 X USB-A PORTS, 2 X RJ45 PORTS	

# Shared Workstations

Shared or hot desks have undergone evolution to cope with the demands of the pandemic, CMS Engage delivers workplace managers the ability to use powerful software and smart hardware to distance and contact-trace desks. CMS Engage can also control power to the desk as part of the check-in process, and desks can be deactivated to distance staff safely.

# Collaborative Spaces

Engage can assist office managers to deliver more thought-out collaborative spaces for staff to book and interact with. By being able to review usage over time with heat mapping, administrators can identify over and under-utilised spaces and modify as required to build a better environment with real-time occupancy data

# Conferencing Areas

With larger capacity, high-traffic meeting rooms, Engage can ensure conferencing spaces are cleaned after each meeting and marked ready to use for the next user, this visibility is key for employees via the Engage desk-booking app for staff to identify clean and available meeting rooms to book for the next team meeting
