Orbit

Single & Dual Monitor Arm Series

Orbit is designed for modern, space-conscious work environments, offering both streamlined aesthetics and advanced ergonomic function. Supporting most flat and curved monitors (up to 12 kg per screen), these monitor arms use a slim profile gas spring mechanism that allows smooth, effortless height and angle adjustments.

Engineered for ease of use and installation, they feature detachable VESA plates, quick-release joints, and tool-free topside mounting, removing the need to access under the desk.

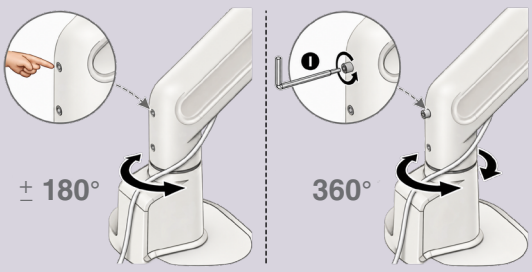

Available in single and dual desk-mounted versions with clamp and grommet options, the arms offer full motion range and 180° screen rotation, including an integrated 180° rotation stop for use near walls or panels. The Orbit Series combines long-term durability with a modern, low-profile look. Ideal for offices, home setups, and e-commerce focused retail, this series emphasises comfort, cable management, and easy assembly.

Colours Available

White

Key Features
