

RACK RAIL POWER UNIT - IEC OUTLETS

CMS Electracom are proud to introduce our new cost effective range of Rack rail IEC power units.

These 1 Rack units are the perfect power solution for your server rack/cabinet to provide maximum protection within your IT environment. Each rail comes with an integrated neon thermal overload switch to prevent your power supply from overloading. Units are available in horizontal and vertical (refer to images) and can be custom made for specific applications.

SOME OF THE FEATURES INCLUDE:

- Compact and convenient solution for providing power to your server rack/cabinet where it is easily accessible
- Supplied with 'Neon Thermal Overload' switch
- Customized to any length and specification you require, with a short turn around
- C13 10Amp Outlets
- Available in vertical or horizontal
- Adjustable fixing kit for vertical rails
- PDU available in Black or White
- C14 10amp Plug or C20 16Amp plugs available upon request
- Circuit breaker protection available
