

MADERA SERIES FLOORBOX

Flanged-edge lid shown in brass.

Butted-edge Flush lid shown in brass.

The Madera floor outlet is designed for use in timber floor applications allowing the surface cut-out to form the lid. The unit can be specified with a single GPO or as a through-floor grommet.

Madera is ideal for residential or commercial fit-outs presenting a high-end brass or stainless steel finish when concealing power in timber or concrete screed floors.

Madera can be specified with either a flanged or a butted-edge lid and finished in either brass or stainless steel.

CUT OUT DIMENSIONS:

- BUTTED-EDGE CUTOUT - 105mm Hole saw
- BUTTED-EDGE REBATE: 111mm hole saw 2mm deep
- BUTTED-EDGE DEPTH - 106mm
- FLANGED-EDGE CUTOUT - 105mm Hole saw
- FLANGED-EDGE DEPTH - 105.9mm
