EXECUTIVE BOX

In Desk Solutions

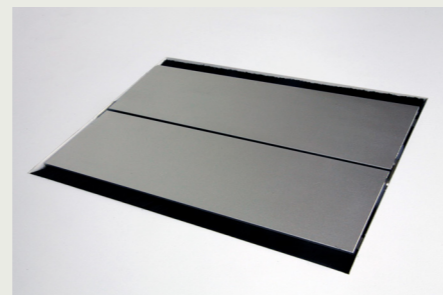

Our Executive in-desk box provides an effective way of supplying power and communications connections within a boardroom, conference or meeting table. It enables all services to be connected within the work surface with easy access to power and data through the stylish bead blasted anodised lid & brush strips. The lids sit flush when in use and the unit is fully compatible with Category 6 structured cabling and beyond.

It is available with a Dual lid or Single lid, giving users access to the box from both sides in the dual lid or one side entry in the single lid version. The aluminium lids also have the ability to be veneered or laminated to blend in with the desired table top finish.

To further enhance work surface connectivity, CMS can offer a range of customised Audio Visual provisions to suit all applications.
