

CPU30 CPU HOLDER

Height adjustable

Rotates 360°

Under desk slide function

Width adjustable

The CPU30 holder effectively raises the CPU tower off the floor and stores the CPU in a safe position under the work surface, therefore protecting your equipment and saving room on your desktop. The rack allows the CPU to work on a sliding system and rotates a full 360° providing easy access to cables and ports. This versatile holder is constructed from Aluminium to secure your CPU tower.

FEATURES INCLUDE:

- Simple sliding system and rotates 360°
- Stores CPU vertically beneath your workstation
- Width and height adjustable
- Weight capacity of 10kg
- Aluminium body clamps tightly on top & bottom of CPU to hold securely
- Accepts CPUs:
 - Min: 250mm x 60mm
 - Max: 380mm x 120mm
