CPU30
CPU Holder

The CPU30 holder effectively raises the CPU tower off the floor and stores the CPU in a safe position under the work surface, therefore protecting your equipment and saving room on your desktop.

The rack allows the CPU to work on a sliding system and rotates a full 360º providing easy access to cables and ports. This versatile holder is constructed from aluminium to secure your CPU tower.

Colours Available

◗ Anodised / Black

◗ Anodised / White
