

# WIRE GRID EXTRA - 100MM WIDE

## Wire management - Single & Dual tier solution

2 Tier shown with WGL2.20 Brackets, 4 x GPO & Data (GPO & Data sold separately)

The **New** CMS 100mm wide cable management basket is the latest addition to the expanding range of cable baskets by CMS. The 100mm wide basket offers greater use in managing cables, plus the flexibility of two new vertical mounting brackets allowing the installer to switch between a two tier basket to a single tier basket.

The mounting brackets screw to the underside of the workstation or back into the modesty panel & allows the basket to snap into the bracket. These baskets can also be cut to a custom length.
